

Hand Sanitiser Data Sheet

Product Description

Hand Sanitiser has been specifically formulated as a non-toxic liquid hand sanitiser which rapidly and effectively sanitises the hands by inactivating a wide variety of harmful and potentially harmful microorganisms whilst moisturizing the skin to prevent dryness and cracking. When used as directed, **Hand Sanitiser** is effective against all alcohol sensitive bacteria, viruses, yeasts and moulds. SCC hand Sanitiser is safe for use on skin and uses only materials safe for skin contact. It is Methanol free.

Usage Areas

Hand Sanitiser is to be topically used on the hands. It can be used after washing hands or in between washes on a regular basis in order to maintain sanitised conditions.

Method of Use

Apply approximately a teaspoon (5ml) of **Hand Sanitiser** onto the hands and work in well to obtain an even coverage all over the skin surface. Do not rinse off with water and allow to air dry. The product will evaporate quickly, leaving skin moisturized and sanitised.

It is recommended that **Hand Sanitiser** be applied prior to, as well as after any contact has been made with suspected contaminated surfaces and/or areas.

Properties
